Education

National University of Life and Environmental Sciences of Ukraine

2019 - Until now

Studied:

Development of processors
based on triggers.

Boolean algebra.

C/C++, Python

Coursea Courses

Books

Java documentation

Spring docs

Skills

Java

Development:

Java Core, Spring Core,
JDBC.

Testing:

Junit5+Mockito.

Build automation tool:

Maven.

Other

Github/GitBash

Sql(PostgreSql)

Basic queries, working with
tables and columns, Join,

Http/Https protocols

Metods, Client-Server
Architecture.

Mircoservice Architecture

API

API development, experience of
interacting with third-party API,
understanding the interaction of
microservices with each other
through API calls

Languages

English - B1(in progress)

Russian - Native

Ukraine - Native

Soft Skills

Honest

Curious

Getting along

Attentive to other

Neat

Development Environments and Systems

Environments:

JetBrains Intelij Idea

Microsoft Visual Studio

Microsoft Visual Studio Code

CMD/Shell

Linux terminal(Screen/Tmux)

Python Venv

Operation Systems:

Windows

Linux (Cloud VPC)

About me

I am a 20 year old computer engineering graduate student at NULES.

I am developing in the direction of back-end development, I want to
develop large and highly loaded systems in the future.

My favorite hobbies are walking with friends, learning new things, reading
books (mostly fantasy), watching movies and series.
