- Teamwork
- Ability to adhere to deadlines
- Responsibility and discipline

LANGUAGES

Ukrainian — native
English — pre-intermediate

SUMMARY

I am a front-end react developer. I like programming because you are constantly looking for solutions to non-trivial problems. Programming also provides opportunities for endless development, which only inspires me. At my current job, I solved all the tasks assigned to me without any significant difficulties, and I also gained experience in teamwork. I can quickly adapt to any technology on the project because it is very interesting for me.

TheMovies - GitHub(front-end) - GitHub(back-end)

[REACT, REACT-ROUTER, CONTEXT, GRAPHQL, APOLLO, TYPESCRIPT, STORYBOOK, MATERIAL UI, REACT INTL, GOOGLE CLOUD FUNCTION]

An app that allows you to see a list of popular movies. Find the ones you like and share them with your friends. The goal was also to practice with GraphQL and internalization of the application.

RickAndMorty - GitHub

[NEXT.JS, USEQUERY, TYPESCRIPT, REDUX/TOOLKIT, REDUX-SAGA, STYLED-COMPONENT, ESLINT, HUSKY, REACT-TESTING-LIBRARY]

The project for fans of Rick and Morty allows you to see all the characters of the series, as well as the number of episodes they participated in and the number of locations. The main goal was to practice with new technologies.

WebStudio - GitHub

[SEMANTIC HTML, ACCESSIBILITY, SASS, ADAPTIVE/RESPONSIBLE CSS, BEM, GIT]

A personal web studio project, which aims to show the basic skills of creating semantics and adapting to different devices' sites

TowerOfHanoi - GitHub

[REACT, TYPESCRIPT, STYLED-COMPONENT, ESLINT, PRETTIER, HUSKY, REACT-TESTING-LIBRARY, STORYBOOK]

The main task was to make a game called Tower of Hanoi. You can test your wits.
